DANCE RESEARCH

Denver, CO- **gogoLab** is an instrumental power trio that re-examines the sound of 60's and 70's film and television through the lens of contemporary dance music. It's a world of double agents, renegade cops, car chases, cat suits and hip-shaking girls in bright polyester miniskirts and thigh-high boots. This is post-modern go-go.

Gogolab's debut album **The Stakeout** has been released. The record is a soundtrack to a spy action b-movie. Our private eye action hero assembles a crack team of renegades who trace

a gang of drug dealers halfway around the world to the jungles of Southeast Asia. (The screenplay is included in the album artwork).

Sounds Like: Medeski Martin and Wood meet James Bond in a dark alley.
